Ms. Donna R. Searcy  
Secretary  
Federal Communications Commission  
1919 M Street, N.W.  
Washington, D.C. 20554

Dear Ms. Searcy:

On behalf of Community Television of Southern California, applicant for a new noncommercial educational television station to operate on Channel \*39 in Bakersfield, California (FCC File No. BPET-881012KE), submitted herewith in triplicate is an Amendment to its pending application. This Amendment is submitted to update and revise various aspects of that application.

If there are any questions concerning this matter, please let me know.

Very truly yours,

Theodore D. Frank  
Counsel for Community  
Television of  
Southern California

Enclosure

ORIGINAL  
RECEIVED

AMENDMENT

OCT 22 1990

The application of Community Television of Southern  
California for a new noncommercial educational television  
station to operate on Channel \*39 in Bakersfield, California  
(FCC File No. BPET-881012KE) is hereby amended in the  
following respects:

1. The attached Exhibit A.1 is substituted for Exhibit A in the pending application to reflect revisions in the applicant's proposal for the station.
2. The attached Exhibit B.1 is substituted for Exhibit B in the pending application to update the list of the applicant's officers and directors.
3. The response to question 1 of Section III is amended to indicate that the applicant has filed an application with NTIA seeking funding under the Public Telecommunications Facilities Program for a portion of the costs of constructing the proposed television station and associated facilities. That application was submitted in order to obtain financial assistance in connection with the construction of this station. However, the application is not contingent on NTIA funding and the applicant will construct the station if its NTIA application is unsuccessful.
4. The attached Exhibit C.1 is substituted for Exhibit C in the pending application to reflect the applicant's programming proposal.
5. The response to question 12 of Section V-C is amended to request a waiver of the main studio rule, Section 73.1125. The applicant is proposing to operate the station as a satellite of Station KCET, Los Angeles, California, in order to be able to provide off-the-air public television service in the most economical and efficient manner. Maintenance of a local studio will substantially increase the construction and operating costs of the station and will thus detract from the applicant's ability to provide programming. As indicated in Exhibit C.1, the applicant has made

arrangements to use as its studios for the origination of local programs the studios to be constructed by Kern County educational authorities. Similarly, the applicant will maintain a local public records file in the community and will maintain a toll-free telephone number by which residents of the Bakersfield area can reach the studios of Station KCET in Los Angeles so that the residents of the area can communicate their views to station personnel. Consequently, grant of this request will serve the public interest by allowing the applicant to devote maximum resources to providing quality, responsive public and instructional broadcast programs, without depriving the public of ready access to station management and information concerning the station's operation.

COMMUNITY TELEVISION  
OF SOUTHERN CALIFORNIA

By: *Henry C. Shroder*

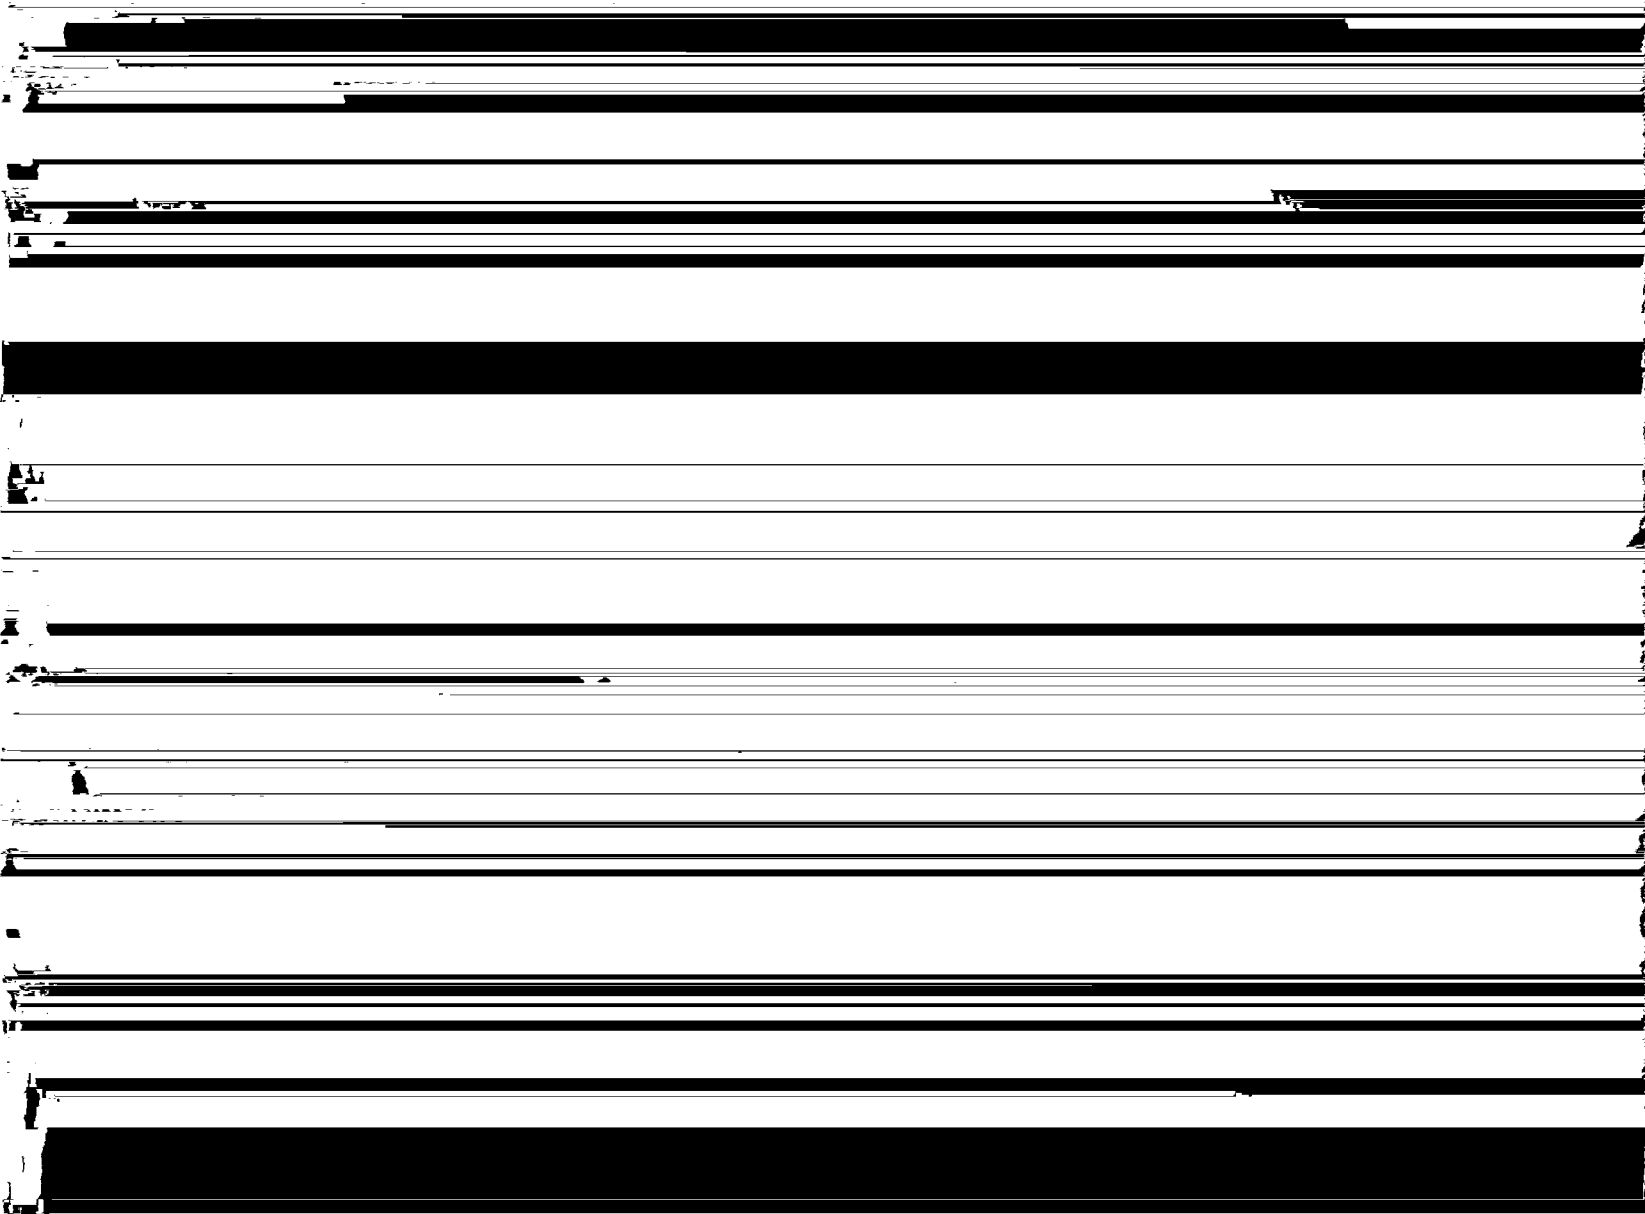

## EXHIBIT A.1

The applicant, Community Television Of Southern California (CTSC), is the licensee of noncommercial educational television Station KCET, Los Angeles, California. CTSC was organized to bring educational television service to the Southern California area. Station KCET commenced operation in 1964 and has been serving the educational, cultural, informational and related needs of Los Angeles and the surrounding area since then. It is the largest public television station in Los Angeles and serves approximately 13,000,000 people throughout Southern and Central California.

For over 20 years, Station KCET has also been serving the public television needs of Bakersfield through the carriage of its signal by cable television systems in Kern County. For a number of years, CTSC has been interested in improving its service to Bakersfield by constructing and operating a public television station there. Operation of such a station would permit CTSC to provide public tele-

filed its application for Channel #39. CTSC views its application as a part of its educational broadcast mission and intends to employ the station to enhance the public television service it provides to the Bakersfield community.

CTSC plans to operate the station as a satellite of Station KCET, rebroadcasting the informational, cultural and public television programs carried by Station KCET. Station

## EXHIBIT C.1

Community Television of Southern California (CTSC) is filing this application in order to improve its service to the residents of the Bakersfield area. CTSC plans to operate the station as a satellite of Station KCET, carrying the wide variety of informational and cultural programming broadcast by that station. In addition, CTSC has been working with local educational organizations in the Bakersfield area to enable those organizations to provide responsive instructional and other educational programs to Bakersfield. CTSC will also work with other educational and cultural institutions and organizations in Bakersfield to integrate its program service with the educational, cultural and other needs of the community.

As part of that effort, CTSC has worked with the Kern County Educational Consortium (which is headed by the County Superintendent of Schools and includes all K-12 school districts county-wide, the four community colleges and California State University Bakersfield) to coordinate the provision of locally-oriented instructional television programming. CTSC is consulting with the County School District in connection with the design and construction of a production and broadcast studio, and anticipates that it will continue working with the Consortium in connection with this facility. This facility will be linked by microwave to

CTSC will have access to the Kern County School District studio to the extent necessary to produce local programming specifically designed to serve the needs of Kern County.

Station KCET currently devotes three hours and thirty minutes, daily, Monday through Friday, to instructional programming supplied by a consortium of school districts and local community colleges in Southern California. CTSC will make that programming available in the Bakersfield area. CTSC has also been working with the Kern County Educational Consortium and California State University Bakersfield to provide instead an instructional package tailored for local needs rather than relying solely on the instructional programming broadcast by Station KCET. CTSC will make the full seventeen and one half hours weekly presently devoted to this instructional programming available to the Kern County Educational Consortium for the broadcast of educational and other programs specially attuned to local needs.

a part of the "Videolog" series, as well as an hour documentary about the Bakersfield Dodgers baseball team. CTSC plans to work with its Bakersfield Community Advisory Board to continue and increase this coverage of matters of interest to Bakersfield. CTSC will, in addition, broadcast programming dealing with issues of concern to the Bakersfield area as the need arises.

CTSC presently has a Bakersfield resident on its Board of Directors and, if awarded the construction permit, will increase representation from the Bakersfield area on its Board.

Applicant: Community Television of Southern California  
Call Letters: KCET
